

Company Team Feature - Frontend Integration Guide

Overview

The Company Team feature allows users to request verification of their employment with a company. Recruiters review requests and approve or reject them. Approved employees appear on the company's public Team page.

Authentication

All protected endpoints require: Authorization: Bearer .

Candidate APIs

POST /api/team/request

Body: companyId, designation, department, employmentType, startDate

GET /api/team/me

Returns the logged-in user's current membership and status.

Recruiter APIs

GET /api/team/pending

GET /api/team/members

PATCH /api/team/:id/approve

PATCH /api/team/:id/reject (body: rejectionReason)

Public API

GET /api/companies/:slug/team

Frontend Pages

Candidate:

- Profile > Experience
- Company search
- Request Join form
- Membership status (Pending/Verified/Rejected/Former)

Recruiter Dashboard:

- Team menu
- Pending tab
- Members tab
- Approve / Reject actions

Company:

- Team tab on public company profile

Suggested Folder Structure

app/
profile/experience/page.tsx
recruiter/dashboard/team/
page.tsx
PendingTab.tsx
MembersTab.tsx
MemberCard.tsx
companies/[slug]/team/page.tsx

components/team/
CompanySearch.tsx
TeamMemberCard.tsx
PendingRequestCard.tsx
TeamStatusBadge.tsx

services/teamService.ts
types/team.ts

API Service Functions

requestToJoinCompany()
getMyTeam()
getPendingRequests()
getTeamMembers()
approveMember()
rejectMember()
getCompanyTeam()

User Flow

Profile -> Experience -> Search Company -> Request Join
-> Pending Approval -> Recruiter Approves/Rejects
-> Public Team Page Updates

Deliverables

Candidate UI, Recruiter Team Dashboard, Company Team page,
API integration, reusable components, loading/error states,
responsive design.
